

Appl. No. 10/043,400
Amdt. Dated July 7, 2003
Reply to Office Action of April 7, 2003

AMENDMENT TO THE SPECIFICATION

[0028] With reference to Figures 6-9, the assembly of the substrate 6 to the housing 4 will be described in greater detail. As shown first in Figure 6, the plurality of leads 102 are ~~lined~~ aligned in respective slots 50, and posts 76 are positioned in respective openings 110. It should be appreciated that posts 76 are profiled for an interference fit with apertures 110, such that substrate 6 is held to housing 4. As shown best in Figure 7, feet members 84 can be positioned in an abutting planar relation with substrate 6 to retain substrate 6 to housing member 4. As shown in Figure 8, housing 4 is shown in a spaced relation relative to substrate 6, and in particular shows the plurality of leads 102 being recessed within its respective slot 50.
